

The Seagull Developer Network – Proposal

The Seagull Developer Network (SDN) is collaboration of various members from within The Seagull Framework Project who have demonstrated the highest level of professionalism, quality, and commitment to excellence in developing world class applications. The SDN offers two levels of membership: Certified Developer and Developer. SDN requires Certified Developers to prove their competency through a series of tests and peer reviews. The certification process for modules and developers results in a best of class code for both the customer and community.

Benefits

There are many advantages to becoming a SDN Certified Developer mainly:

- Referrals from the Seagull Developer Bounty program.
- Discounts on Certified Seagull Modules
- Rights to resell Certified Modules..
- Free Modules only available to Certified Developers.
- Account on SDN PEAR Channel Server allowing for you to easily distribute your Modules.
- All the benefits of SDN Developers.

SDN Developers receive the following benefits:

- Account on SDN Development Servers.
- SDN Monthly Newsletter.
- Access to Seagull Developer Articles and Tutorials.
- PEAR Packages for Seagull Core and Modules available within one week of the release of a Development Release.

Join SDN

- Agree to and sign the Code of Conduct, an Individual Contributor License Agreement (ICLA) and a Seagull Developer Application.
- Contribution to The Seagull Framework Project in the form of bug fixes, enhancements, documentation, translations, and/or donations and the continuation of contributions to The Seagull Framework Project throughout the lifetime of your membership.
- Develop a minimum of 5 Seagull based applications, one of which must be your personal or business's web site.
